

Electronic training collars and GPS tracking devices for dogs

Catalogue 2024

About us

We are a Czech manufacturer of electronic training aids for dogs. We have been on the market since 2004 and today we are one of the most important companies in this field.

We develop

We have a long term cooperation on the product development with the support of VNT electronics s.r.o.

We produce

PCB production for Dogtrace products is provided by a subsidiary company Morelli electronics s.r.o.

We complete

All our products are manufactured and assembled in Lanškroun.

Other brands

We transfer our development and production experience to other brands.

Assurance of safe products

We are a proud and active member of the ECMA (Electronic Collar Manufacturers Association).

ECMA was founded in 2004 on the initiative of VNT electronics s.r.o. and other world manufacturers of electronic training aids for dogs. Members' products meet all safety parameters and their compliance is strictly controlled.

We are convinced that electronic training collars are safe when used responsibly. Combined with rewards and praise, these are the ideal tools for professional training and training of dogs with problem behaviors.

„Every day we fulfil our ambition to be the company that sets the trend in the development and production of training and tracking devices for dogs.“

Jiří Novák
Owner and Director of Development

Why Dogtrace?

20 years on the market

We have been improving dog training conditions for 20 years.

We cooperate

We work with industry professionals, sports cynologists, veterinarians and security forces to develop our products.

We love animals

We are breeders and dog owners. All of our products are aimed at making training more effective and all products have been rigorously tested on our pets.

We are delighted to present the new Dogtrace catalogue for 2024. This year has a special significance for us as it is the 20th anniversary of the brand.

The dog training aids sector has always been our heart's business. That's why we are constantly striving to push forward in this sector and why our products are among the best.

Our experience and effort to offer perfect solutions has led to products that only a few companies in the world can technologically produce.

Dog Gordy and the first Dogtrace products

The owner's dog, a Labrador retriever Gordy, became an inspiration for improving the conditions of cynology and was therefore behind the creation of the Dogtrace brand.

2004

With 4 employees we are starting to build a company based in Litomyšl. Our first products include the d-mute anti-bark collar, d-control training collar and d-fence invisible fence.

2008

With a total of 30 employees, we are moving to larger premises in Némčice and expanding our product portfolio. We are gradually launching, among other things, the d-control vibrating collars, the new d-control Professional range of training collars and the new generation of the d-fence 6th SENSE invisible fence.

2017

We are gradually growing to 70 employees and moving to new premises in Lanškroun. We launch the first DOG GPS tracking device. We focus on the development of more technologically advanced products. We also establish a second brand, fencee.

2024

We currently employ over 170 employees and are opening a new logistics centre with a capacity of over 1000 pallet places. This enables us to flexibly supply more than 70 countries with our products and to continuously work on new product development.

Discover all features

Training aids have many functions. See which ones.

Sound allows the receiver to activate a tone whose intensity is always perceived by the dog in the same way, regardless of the distance from the handler. It can replace the whistle and is a very effective warning before sending a stimulation impulse.

Impulse allows to activate alerts in several levels in the receiver in the form of safe stimulation impulses. You can choose between short and long pulses.

Booster allows you to quickly apply a higher level of stimulation intensity than is set for the stimulation impulse function.

Vibration allows in several modes to trigger vibration in the receiver. This function serves as an alternative method of communication for hearing impaired dogs or for training dogs hypersensitive to stimulation impulse.

Light serves to easily locate the dog in the dark. It allows in several modes to trigger the light signaling using powerful LEDs located in the transparent receiver box.

The device is completely **waterproof**.

The training collar has the possibility of training **one dog**.

The training collar has the possibility of training **two dogs** from one controller.

The training collar has the possibility of training **six dogs** from one controller.

Spray stimulation allows to activate in several levels an alert in the receiver in the form of an unpleasant cooling spray, which is directed to the dog's snout.

Maximum length of invisible fence installation **1200 m**.

Maximum length of invisible fence installation **2200 m**.

Ball diameter for feeders and ejectors.

Number of balls for feeders and ejectors.

The height and length of the ball throw from the feeder.

Device has a **rechargeable battery**.

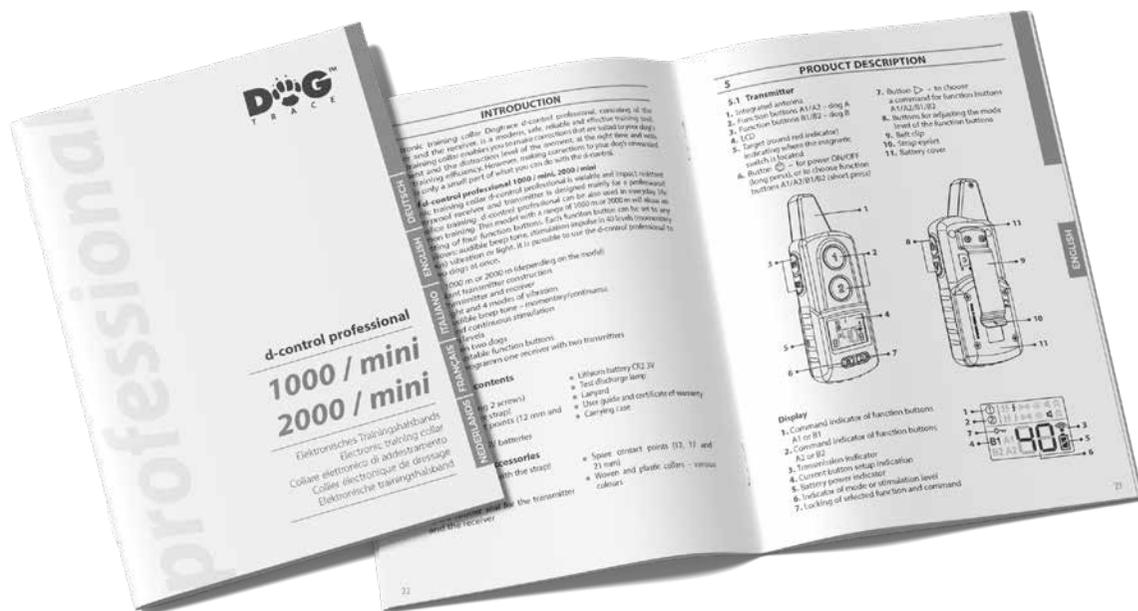

Very small size of the receiver.

Option to **lock** the transmitter **keypad**.

Electronic training collars

d-control

The **d-control** devices are a reliable, effective and safe means of **training and building a positive relationship between human and dog**. You can give your dog plenty of freedom when walking together, while still being able to **warn him of danger in time**.

They are suitable for **sporting** or **hunting cynology**, as well as for those who have **problems with recall** and want to be sure that their dog will not run away when walking together.

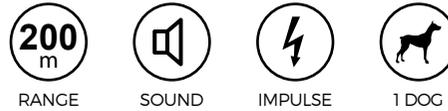

All receivers are waterproof and developed to be as comfortable as possible for the dog.

d-control easy

Training collar **with a range of up to 200 m**, for medium and large dog breeds, **6 fixed impulse levels** and sound function. Waterproof receiver.

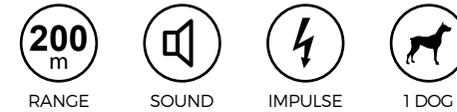

- **Stimulation impulses:** 6 levels
- **Transmitter:** 110 × 52 × 29 mm / 64 g
- **Receiver:** 64 × 43 × 34 mm / 56 g
- **Belt:** 25 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 302

d-control easy small

Training collar **with a range of up to 200 m**, for medium and larger breeds, **6 fixed impulse levels** and sound function. Device with weaker impulses than the regular d-control easy collar. Waterproof receiver.

- **Stimulation impulses:** 6 levels
- **Transmitter:** 110 × 52 × 29 mm / 64 g
- **Receiver:** 64 × 43 × 34 mm / 56 g
- **Belt:** 25 mm × 45 cm / woven
- **Battery:** CR2 3V
- **Product code:** 301

d-control 400

BESTSELLER

The most popular training collar **with a range of up to 250 m**, for all breeds, with the possibility of training two dogs. **19 levels of stimulation impulses**, sound function, booster and backlit display. Waterproof receiver.

- **Product code:** 331

d-control 1600

Training collar **with a long range of up to 1600 m**, suitable for all breeds, with the possibility of training two dogs. **30 adjustable stimulation levels**, sound function, booster and backlit display. Waterproof receiver.

- **Stimulation impulses:** 30 levels
- **Transmitter:** 119 × 53 × 28 mm / 95 g
- **Receiver:** 64 × 43 × 34 mm / 56 g
- **Belt:** 25 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 341

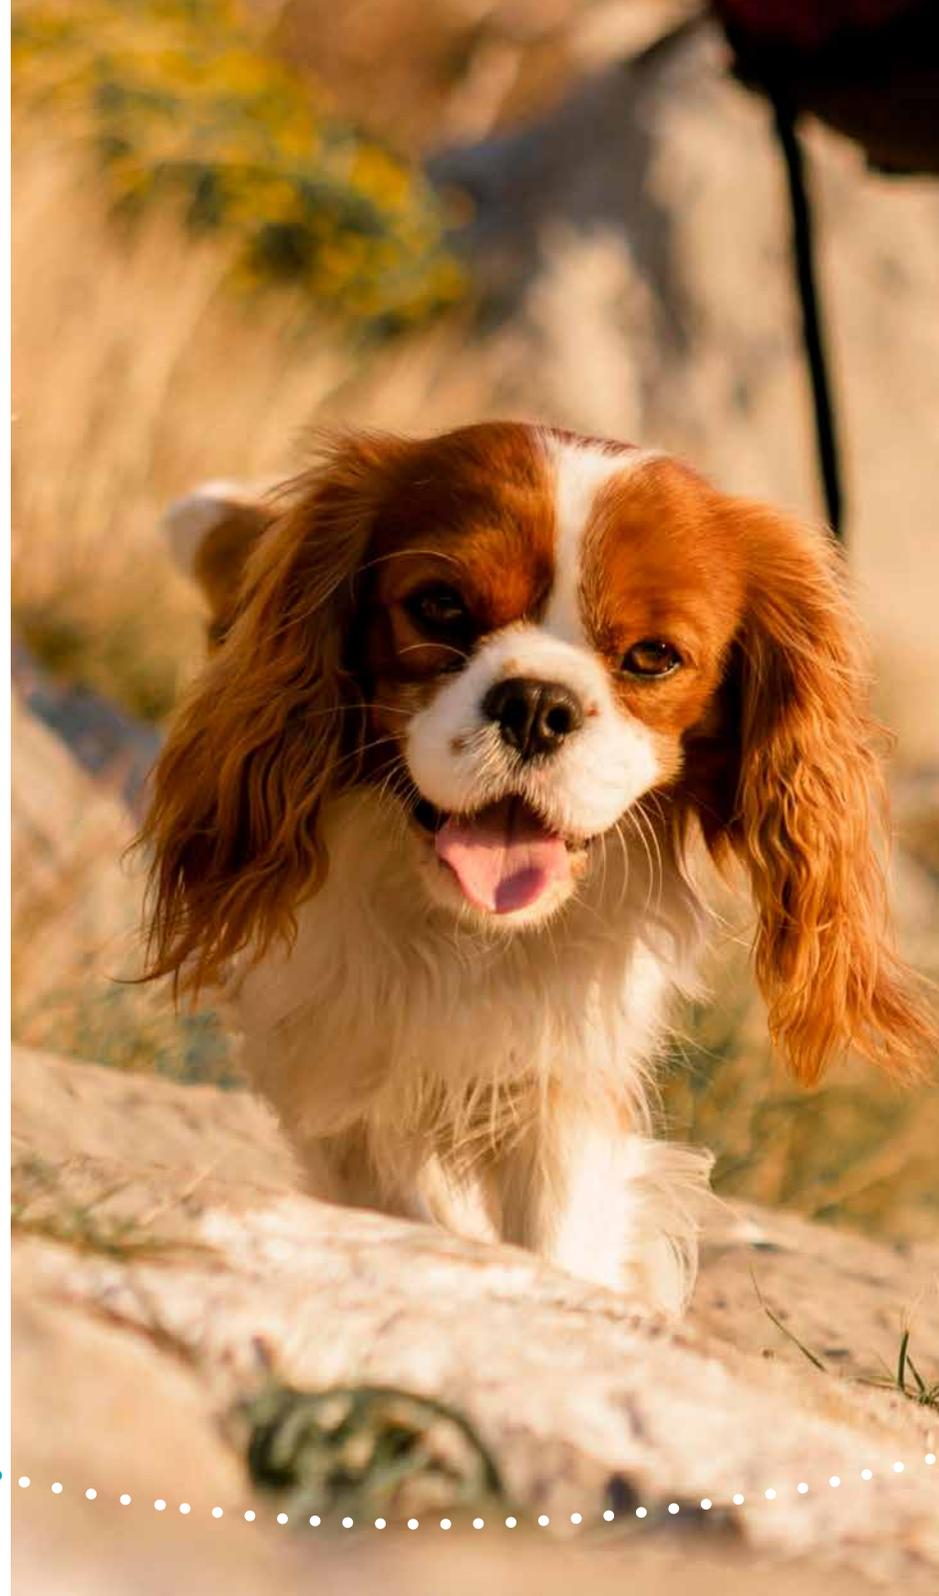

Electronic training collars

d-control mini

The **d-control mini** training collars are smaller than the basic d-control models. The receiver is lighter, with smaller dimensions and weaker stimulation pulses.

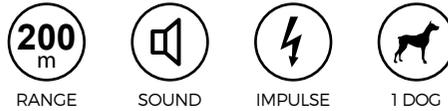

This makes them suitable for small and medium sized dog breeds or large more sensitive and less temperamental dogs. The collars are equipped with sound, stimulation pulse and booster functions. Most models can be used to train two dogs at once and the ranges are split at 200, 500, 900 and 1500m. All collars are **very durable** and **waterproof**.

d-control easy mini

Training collar **with a range of up to 200 m**, suitable for small dog breeds, **6 fixed impulse levels** and sound function. Waterproof receiver.

- **Stimulation impulses:** 6 levels
- **Transmitter:** 110 × 52 × 29 mm / 64 g
- **Receiver:** 61 × 40 × 31 mm / 44 g
- **Belt:** 20 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 351

d-control 200 mini

Training collar **with a range of up to 200 m**, suitable for small breeds, with the possibility of training two dogs. **19 levels of stimulation impulses**, sound function and backlit display. Waterproof receiver.

- **Stimulation impulses:** 19 levels
- **Transmitter:** 110 × 52 × 29 mm / 64 g
- **Receiver:** 61 × 40 × 31 mm / 44 g
- **Belt:** 20 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 352

d-control 500 mini

Training collar **with a range of up to 500 m**, suitable for very small breeds, with the possibility of training two dogs. **30 adjustable stimulation levels**, sound function, booster and backlit display. Waterproof receiver.

- **Stimulation impulses:** 30 levels
- **Transmitter:** 119 × 53 × 28 mm / 88 g
- **Receiver:** 61 × 40 × 31 mm / 44 g
- **Belt:** 20 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 354

d-control 900 mini

Training collar **with a range of up to 900 m**, suitable for very small breeds, with the possibility of training two dogs. **30 adjustable stimulation levels**, sound function, booster and backlit display. Waterproof receiver.

- **Stimulation impulses:** 30 levels
- **Transmitter:** 119 × 53 × 28 mm / 88 g
- **Receiver:** 61 × 40 × 31 mm / 44 g
- **Belt:** 20 mm × 75 cm / woven
- **Battery:** CR2 3V
- **Product code:** 356

d-control 1500 mini

Training collar **with a range of up to 1500 m**, suitable for very small breeds, with the possibility of training two dogs. **30 adjustable stimulation levels**, sound function, booster and backlit display. Waterproof receiver.

- **Stimulation impulses:** 30 levels
- **Transmitter:** 119 × 53 × 28 mm / 95 g
- **Receiver:** 61 × 40 × 31 mm / 44 g

External control

d-control one touch

Training collars **d-control 610, 1010, 1610** and **d-control 510, 910, 1510 mini** are equipped with external remote control – one touch. This allows you to **activate** the selected **stimulation impulse** in the receiver with **one touch**.

A useful accessory for training sport or hunting cynology or for sporting activities such as **running, cycling, riding**, etc. The one touch control can only be used on these modified d-control models that have a connector input.

Collars d-control:

610 – Product code: 325

1010 – Product code: 335

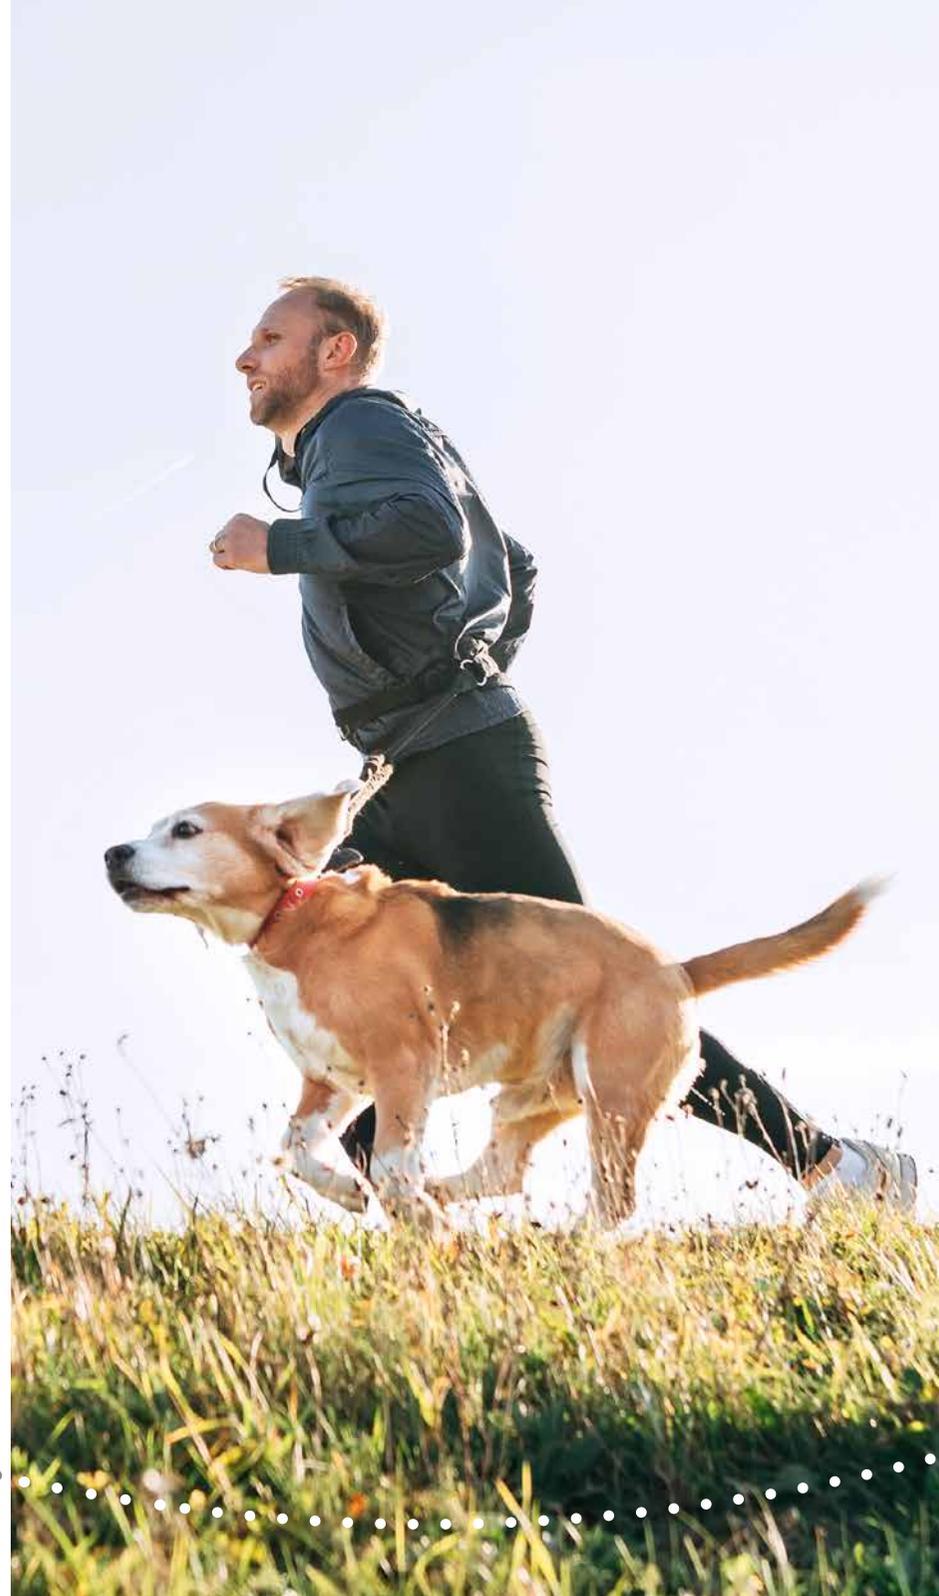

1610 – Product code: 345

Collars d-control mini:

510 – Product code: 369

910 – Product code: 370

1510 – Product code: 371

External control d-control **one touch**

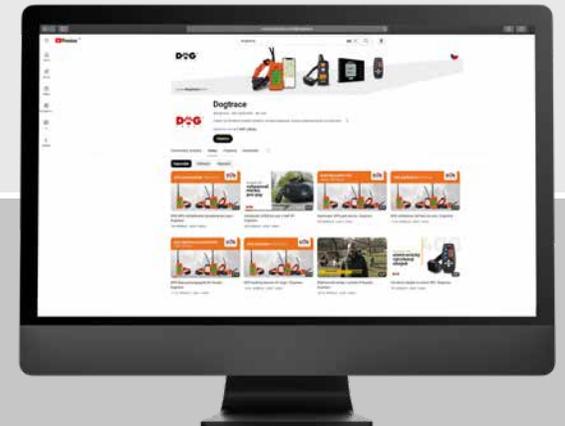

The **d-control** and **d-control mini** sets can also be used with external controls, which can be used especially for **professional sports** and **hunting training**, but can also be used for **running, cycling or riding**.

The external control (one touch) can **only** activate **the stimulation impulse** function in the receiver, the other functions can be activated by pressing the button on the transmitter.

- **Cable length:** 140 cm
- **Product code:** 421

Electronic training collars

d-control Edge

The new **d-control Edge** range of training collars for **professional cynology** and **everyday walking** provides the basic functions of impulse, sound, vibration and booster. You can control up to 6 collars from one transmitter and one collar can be controlled by two transmitters simultaneously. The transmitters can also be rechargeable with keypad lock function and vibration response at the touch of a button.

The collars in two sizes are waterproof. d-control Edge devices with 30 levels of stimulation impulses are suitable for all dog breeds. The collars can be deactivated for impulses and the device can be used as vibration only.

The Edge 200 device has 6 fixed impulse levels and doesn't have a keypad lock function with vibration response.

Read how the collars work for other dog owners.
More articles can be found on our blog.

Thanks to the training collar, the dog can be at large and yet completely under control.

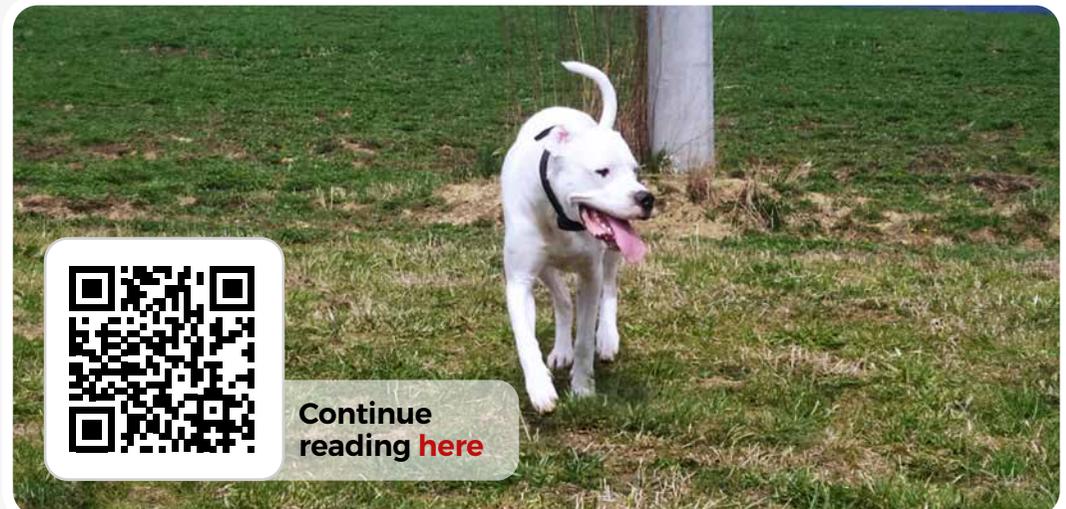

“ Hello, we have had the **Dogtrace d-control 400** training collar for 8 years. We are completely satisfied with it as it is a great help in training the dog. The collar can withstand everything, water, mud, bumps and the transmitter has even been run over by a car and still works. ”

says Marie Jochovičová

I love big dogs and thanks to the Dogtrace training collar I can be a proud owner.

“ Despite the fact that we regularly visit the training centre and Perseus (Argentine Great Dane, 9 months) knows all the commands, **letting him out was always a horror**. He is a very good and sociable dog, one might say too much so. Therefore he ran away from us to every dog, unfortunately also to strangers, whom he liked to lick. ”

says Stanislava Michaličková

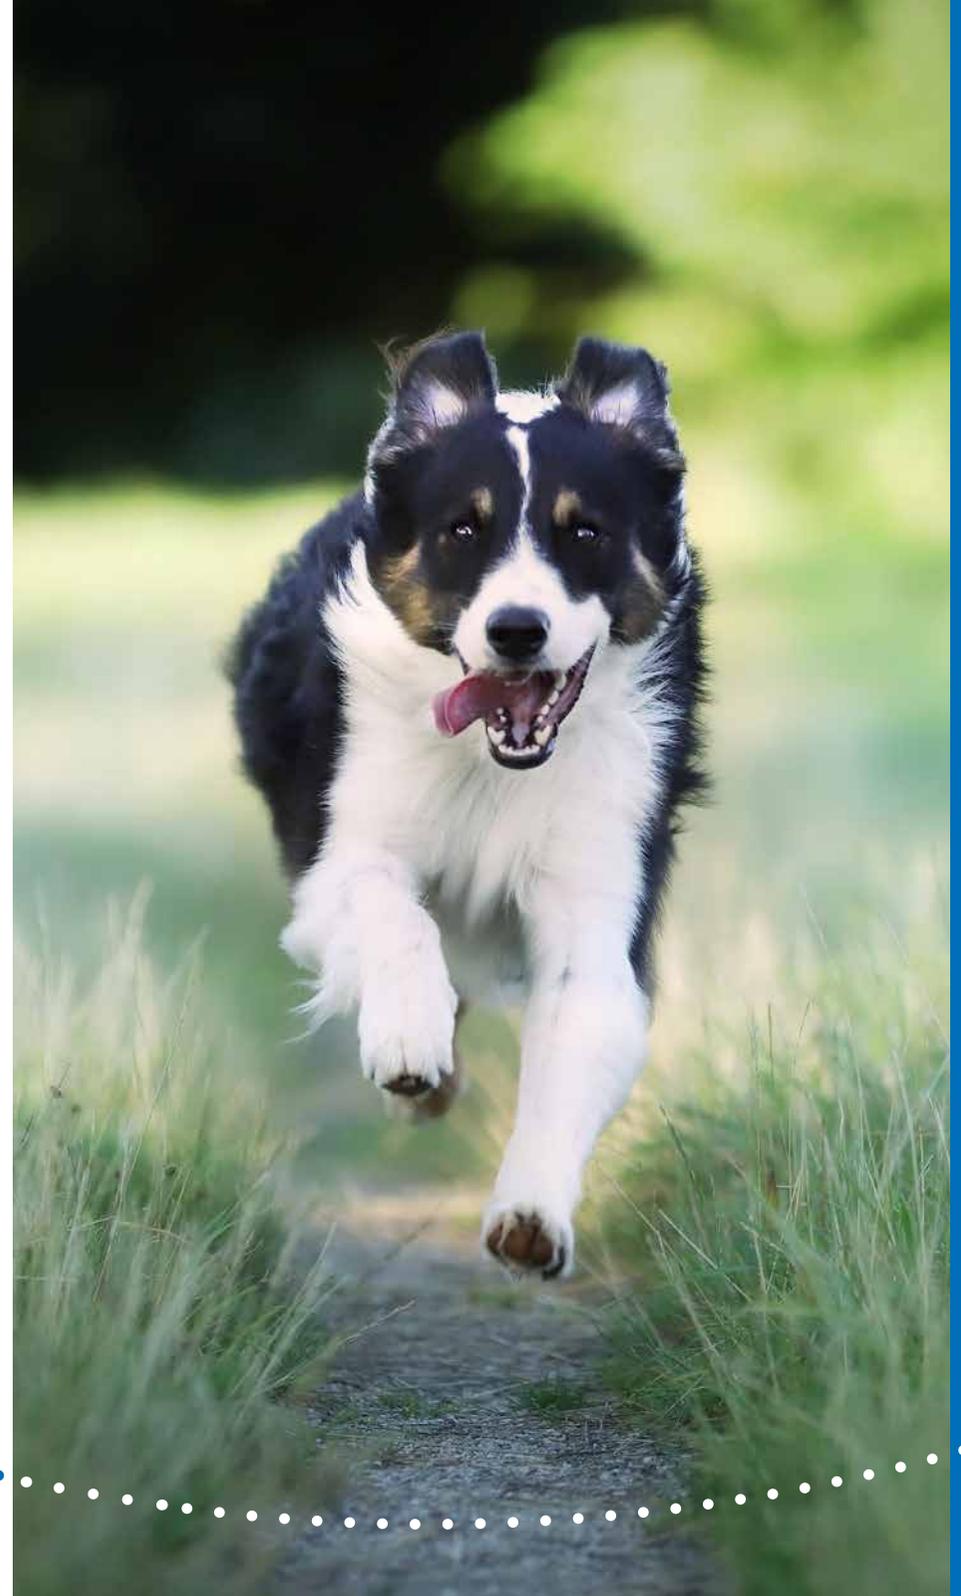

Spray training collars

d-control AQUA spray

d-control AQUA spray training collars are a great tool for training and educating **less temperamental dogs**. They help to disturb the dog from inappropriate behaviour at the right time. The collars are also a great help during walks, when the dog will appreciate sufficient freedom of movement, but will still be safe and under your control.

The main function of this device is **correction** in the form of an unpleasant cooling spray. Even the sound made when using the spray is enough to disturb the dog.

commissioning.

Electronic invisible fences

d-fence

Electronic invisible fence **d-fence** allows you to **quickly** and **easily** **define the boundaries of the area in which your dog can move freely**. It offers the ideal solution in cases where your dog does not respect the existing fence and keeps running off the property, or to demarcate areas within the property that you do not want your dog to have access to. The device can also be installed very easily in **places where a conventional fence cannot be used**.

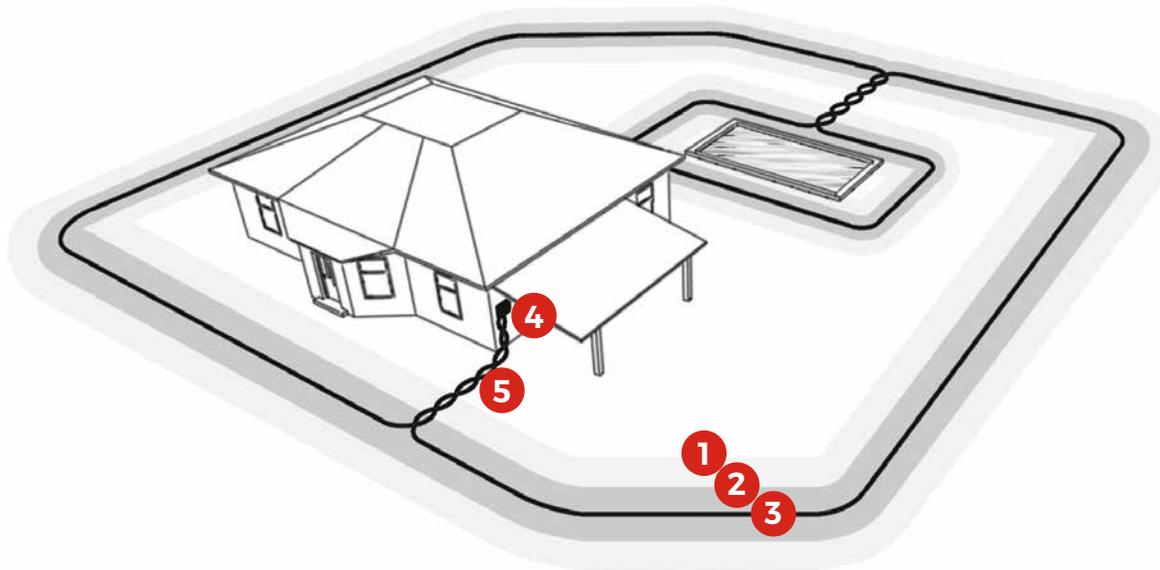

Thanks to the invisible fence, your dog will quickly learn to respect the boundaries of the defined area and will only move freely in places **where he is not in danger**. The collar is suitable for all dog breeds.

How does it work?

The generator sends a signal to the antenna wire, which you use to demarcate the selected area. The dog has a receiver on its neck that receives this signal and if it crosses the boundary of **the first (warning) zone**, the receiver starts to emit an intermittent sound signal.

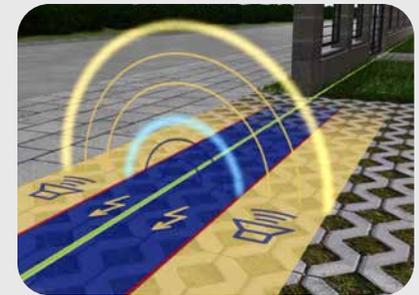

If the dog does not respond to the audible warning and crosses the boundary of **the second (correction) zone**, the receiver will emit an audible signal and a stimulation impulse at the same time. The intensity of the stimulation and the width of the correction and warning zones can be easily adjusted.

- 1 WARNING ZONE
- 2 CORRECTION ZONE
- 3 ANTENNA WIRE
- 4 GENERATOR
- 5 TWISTED WIRE FOR FREE MOVEMENT OF THE DOG

Function ISIT – Interference Signal Intensity Test detects the occurrence and intensity of interfering signals in the places where you plan to install the antenna wire and avoids possible problems with the correct function in advance.

Watch the video on **how to install an invisible fence d-fence.**

d-fence 101 / 1001

Invisible fence with a maximum installation length of up to 1200 metres and infinitely adjustable zones.

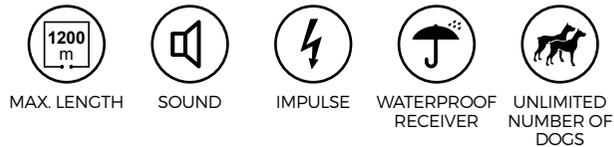

Features of the invisible fence d-fence 101/1001

- Mains power supply
- Enclosed area of **maximum 9 ha**
- **Warning zone** adjustable from **0.4 to 5 m**
- **Correction zone** adjustable from **0.3 to 1.5 m**
- Simple and easy adjustment with rotary buttons

d-fence 101

Invisible fence with a maximum **installation length of up to 1200 m. 8 levels of stimulation impulses** and sound function. The set includes **100 m of antenna wire** with a cross section of 0.75 mm². Waterproof receiver.

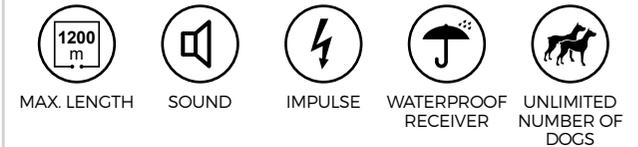

- **Stimulation impulses:** 8 levels
- **Generator:** 152 × 119 × 42 mm / 216 g
Adapter: 230 V / 50 Hz, 14 V / 1000 mA
- **Receiver:** 64 × 43 × 34 mm / 60 g
Battery: CR2 3V
- **Belt:** 25 mm × 70 cm / woven
- **Product code:** 201

d-fence 1001

Invisible fence with a maximum **installation length of up to 1200 m. 8 levels of stimulation impulses** and sound function. Waterproof receiver.

- **Stimulation impulses:** 8 levels
- **Generator:** 152 × 119 × 42 mm / 216 g
Adapter: 230 V / 50 Hz, 14 V / 1000 mA
- **Receiver:** 64 × 43 × 34 mm / 60 g
Battery: CR2 3V
- **Belt:** 25 mm × 70 cm / woven
- **Product code:** 210

How to use and familiarize your dog with **the invisible fence**

In order to succeed with the invisible d-fence and keep your dog under control, you **need to undergo proper training**. It is advisable to start using the d-fence and training around 6 months of age, when the puppy should already understand your commands and you should know the puppy's character. We don't recommend using a collar on dogs that are not in good physical condition (e.g. heart problems, epilepsy, etc.) or have behavioural problems.

Respect the boundaries of the newly enclosed area

When using a fence for the first time, **it is important to familiarize the dog with the enclosed space and the invisible fence**, first play with the dog for 5-10 minutes. In a happy state, take the dog on a leash to one of the boundary flags. When the dog crosses the boundary of the warning zone, hear the warning beep, let him listen for 2 seconds and then pull him back, offering a reward and praise each time he returns.

d-fence 6th SENSE

Unique invisible fence system with **backlit LCD display, backup power supply** in case of mains power failure and infinitely adjustable zones.

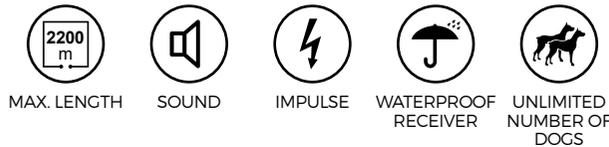

d-fence 6th SENSE 2002/202 model is a modern device **with a backup power supply** that ensures safe operation of the generator during a mains power failure for up to 16 hours. It is suitable for fencing larger properties with installation lengths of up to 2200 metres. The warning and correction band is adjustable from zero and over a wider range.

Features of the invisible fence d-fence 6th SENSE 2002/202

- Mains power supply + **backup power supply**
- Maximum fence length **up to 2200 m**.
- Fenced area **maximum 30 ha**
- **Warning zone** adjustable from **0 to 15 m**
- **Correction zone** adjustable from **0 to 15 m**
- Clear, intuitive touch control with large LCD display and multilingual menu
- More accurate evaluation of the loop in the event of a fault

d-fence 202

Invisible fence with backup power supply and maximum **installation length up to 2200 m**. **8 levels of stimulation impulses** and sound function. Waterproof receiver.

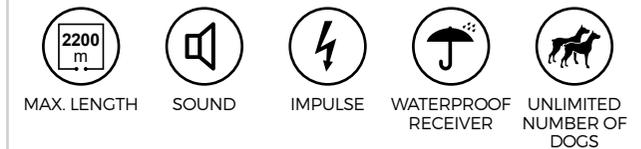

- **Stimulation impulses:** 8 levels
- **Generator:** 156 × 116 × 35 mm / 316 g
Adapter: 230 V / 50 Hz, 15 V / 300 mA
Backup power supply: accumulator 9,6 V
- **Receiver:** 64 × 43 × 34 mm / 60 g
Battery: CR2 3V
- **Belt:** 25 mm × 70 cm / woven
- **Product code:** 221

d-fence 2002

Invisible fence with backup power supply and maximum **installation length up to 2200 m**. **8 levels of stimulation impulses** and sound function. The set includes **100 m of antenna wire** with a cross section of 0.75 mm². Waterproof receiver.

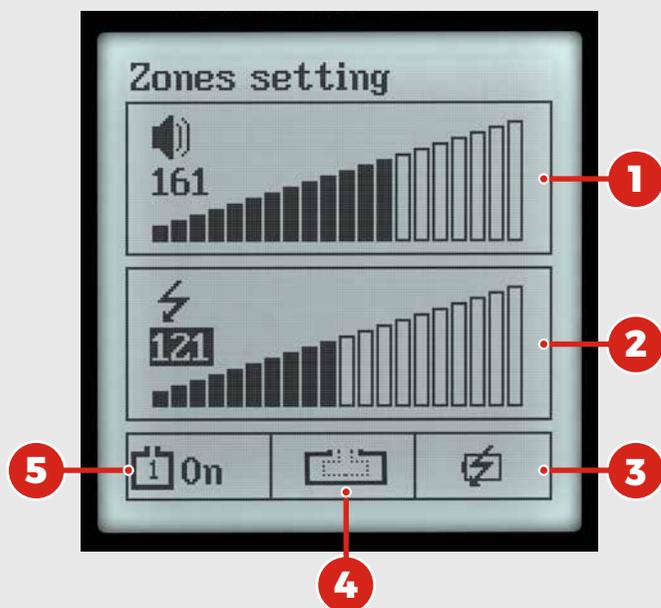

- **Stimulation impulses:** 8 levels
- **Generator:** 156 × 116 × 35 mm / 316 g
Adapter: 230 V / 50 Hz, 15 V / 300 mA

- **Receiver:** 64 × 43 × 34 mm / 60 g
Battery: CR2 3V
- **Belt:** 25 mm × 70 cm / woven
- **Product code:** 223

Simple and clear **zone settings**

The large LCD display makes it easy to set the desired values for the invisible fence.

- 1 Warning zone setting
- 2 Correction zone setting
- 3 Battery status
- 4 Indication of installation length
- 5 Antenna wire status

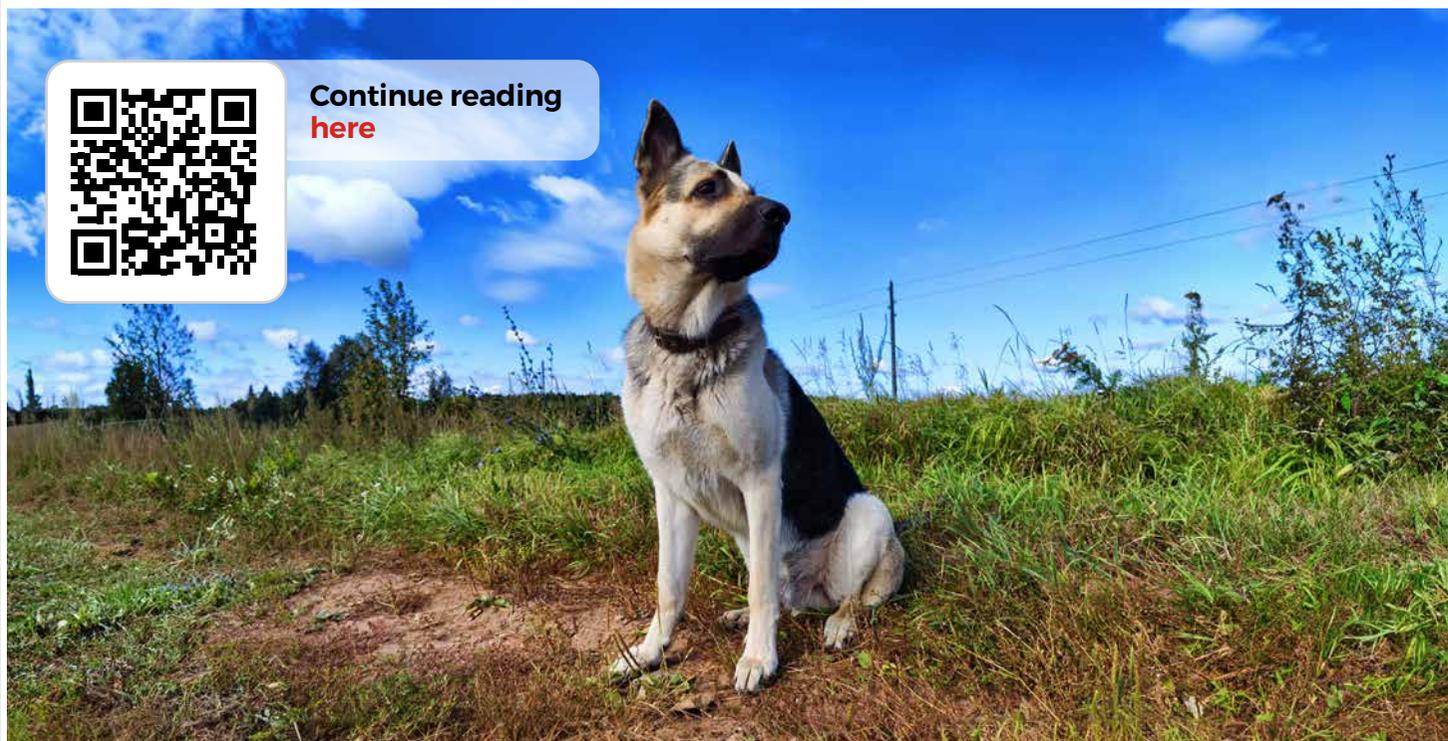

Review

End of walks around the area

“ For more than a year I have been using **Dogtrace d-fence 202** electronic invisible fence (with display and battery backup) in my rugged garden (length of installation around the perimeter approx. 250 m).

Previously, my peculiar, massive Eastern European Shepherd (68 cm at the withers, 50 kg) had a tendency to search for weak spots in the fences and go on walks alone in the surrounding area. However, a few stimulation impulses from the el. collar (set to half intensity) and he quickly learned to respect the demarcated zones within the property boundary.

says Štěpán Hálek

Accessories for **invisible fences d-fence**

Another collar

Collar with woven strap for another dog.

- **Product code:** 202

Power cable

Cable for power supply from car battery.

- length **170 cm**
- **Product code:** 8045

Notch connectors

For connection of the antenna wire.

- 4 pcs in the package
- **Product code:** 213

Antenna wire

Single insulated wire **100 m**.

- Installation up to 400 m - **0,75 mm²** (code: 211)
- Installation 400-600 m - **1 mm²** (code: 207)
- Installation 600-900 m - **1,5 mm²** (code: 208)
- Installation 900-1200 m - **2,5 mm²** (code: 209)

Plastic targets

Plastic targets for **marking prohibited zones**.

- 8 pcs in the package
- **Product code:** 204

Antenna connector

To connect the antenna wire to the generator.

- **Product code:** 206

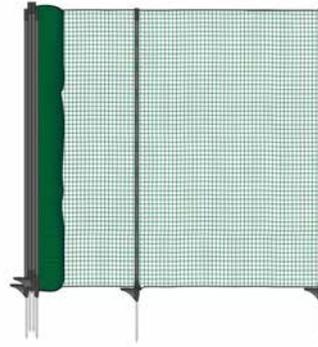

Mobile fences and nets for dogs

A portable mobile dog fence that quickly provides privacy and creates space for your dog in the garden, around the house.

Mobile fence set

- **Height:** 90 cm
- **Length:** 50 m
- **Gate width:** 81 cm
- **In the package:** 2 pcs mobile net 90 cm + entrance gate to the net
- **Product code:** 8499

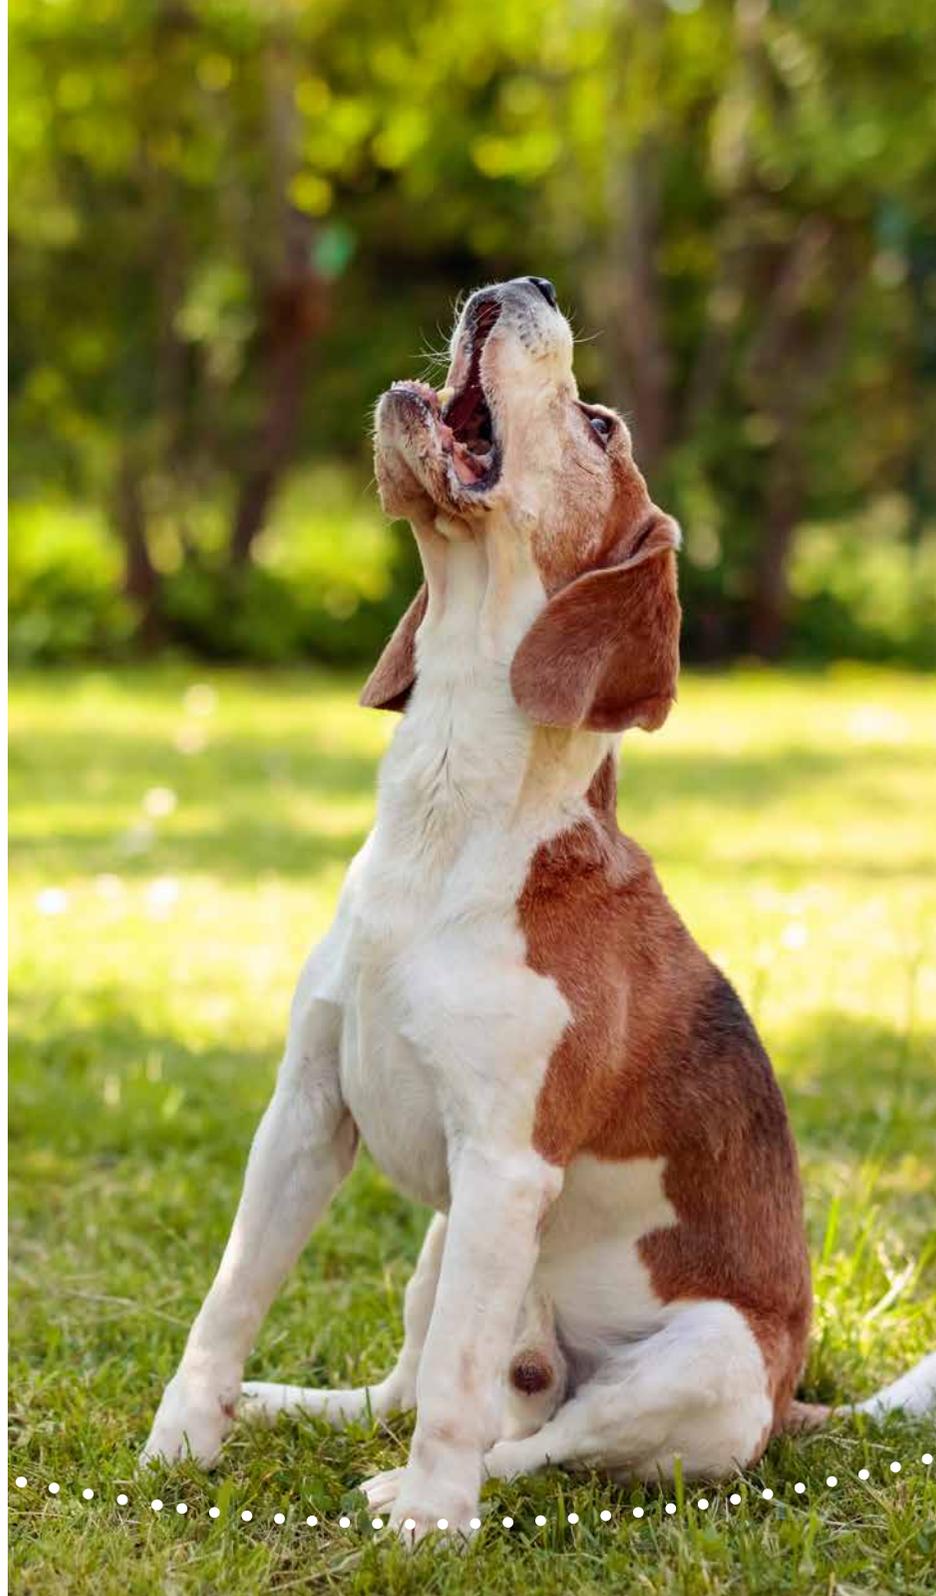

Electronic collars anti-bark

d-mute

d-mute anti-bark collar is a **safe and effective means of helping to eliminate excessive barking** in dogs. It simply and effectively solves cases where the dog reacts by barking at the slightest stimulus, or barks in the absence of the owner and thus annoys its surroundings.

The collar, which is worn around the dog's neck, is activated by the vibration of the dog's vocal cords. The system thus prevents the risk of false triggering caused by the barking of surrounding dogs.

Choose the right size

The choice of receiver is determined by the size and sensitivity of the dog.

Model	Dog size	Breed example
d-mute	large	Rottweiler, Great Dane, Pit Bull
d-mute light	medium	German Shepherd, Retriever, Ridgeback, Setter
d-mute small	small	Beagle, Cocker Spaniel, Border Collie, Spitz
d-mute small light	the smallest	Dachshund, Shi-tzu, Yorkshire Terrier
d-mute ONE	universal	for breeds from 2,5 kg

Training ball droppers

d-balls

Training **d-balls** droppers, **d-ball mini** and ball throwing machine **d-ball UP** are an effective tool for motivational training and practice of various exercises. They allow you to reward your dog by releasing the ball at the right moment for a well-executed exercise. They are suitable for sports cynology, police training centres and home use.

d-balls

One transmitter can control up to four droppers, each with a sound function and a tray for four balls that can be launched individually.

d-ball mini

Dropper in two versions. The velcro version can be easily attached to the handler's vest. The version with magnet is suitable for attaching to car bodies and all metal objects.

d-ball UP

The ball is launched from the device up to 3 m from an angled position, with the use of a metal support a range of up to 6 m can be achieved. The low profile of the device allows for easy camouflage. Up to 4 ball throwing machines can be controlled by the transmitter. d-ball UP is compatible with d-balls.

velcro d-ball mini

Ball dropper with Velcro for **easy attachment to the handler's training vest.**

- Velcro for attachment to vest
- Ball release in combination with sound signal
- **Transmitter:** 84 × 36 × 20 mm / 26 g
Battery: CR2430 3V (lifetime 6 months)
- **Dropper:** 110 × 104 × 88 mm / 240 g
Battery: CR2 3V (lifetime 6 months)
- **Product code:** 513

magnet d-ball mini

Ball dropper with magnets for **attachment to metal objects or fabric.**

- Magnets for attachment to clothing or metal objects
- Ball release in combination with sound signal
- **Transmitter:** 84 × 36 × 20 mm / 26 g
Battery: CR2430 3V (lifetime 6 months)
- **Dropper:** 110 × 104 × 88 mm / 203 g
Battery: CR2 3V (lifetime 6 months)
- **Product code:** 520

d-balls

Professional ball dropper with tray and **control range up to 250 m.**

250

Tracking & training system

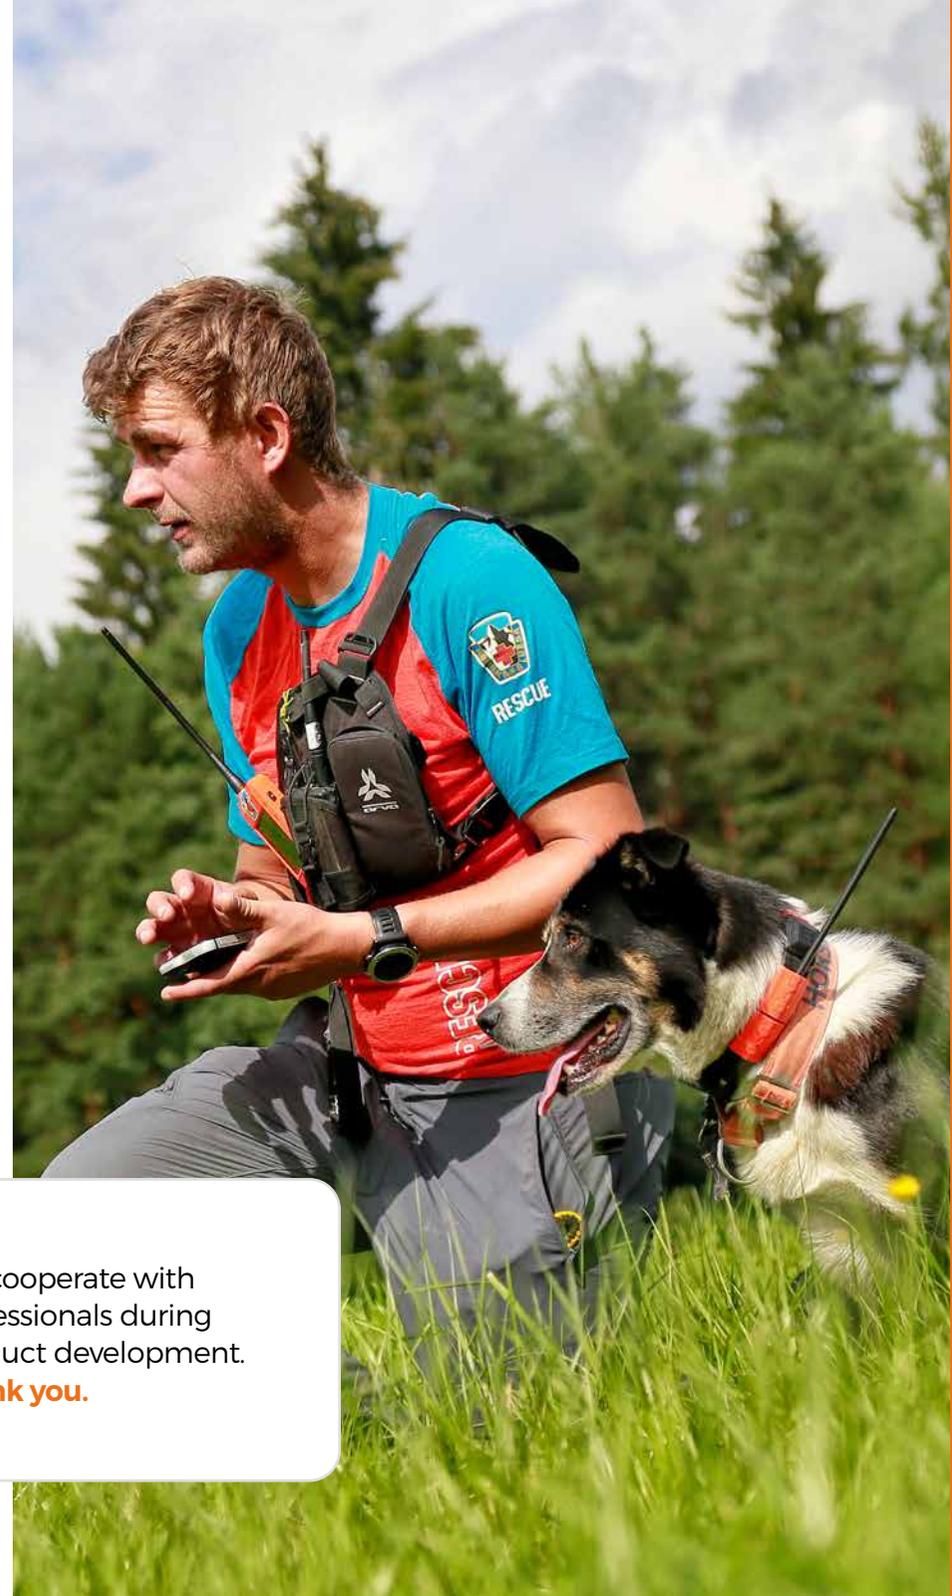

DOG GPS

DOG GPS is used to track dogs **up to 20 km** and allows you to **locate 9 to 19 dogs** depending on the model you choose. The devices use **the latest** LoRa radio signal modulation **technology**.

The set includes a transmitter, which is placed on the dog's collar, and a receiver (handheld device), on which the handler can see all important parameters and can remotely control individual functions of the device.

In the development of the products we **cooperate with professionals from the industry, hunting, rescue forces** and thanks to this the DOG GPS devices have many functions that are specially tailored to individual needs according to the type of use.

Choose the right size

DOG GPS X20

Basic variant of the tracking device for dogs.

- Up to 9 dogs
- Range 20 km
- 1 collar option

DOG GPS X25

Advanced variant of the tracking device for dogs.

- Up to 19 dogs
- Range 20 km
- 4 collar options

DOG GPS X30

Professional variant of the tracking device for dogs, compatible with the mobile app.

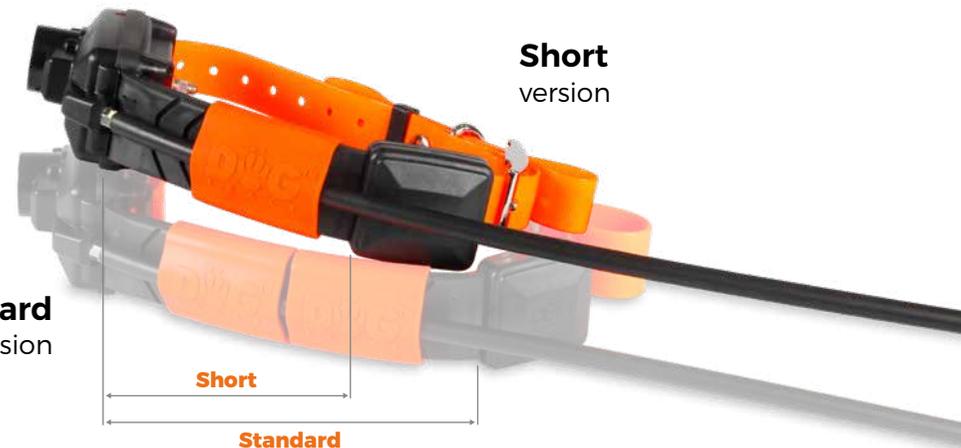

- Up to 13 dogs
- Range 20 km
- 4 collar options
- Mobile app for phone, tablet or watch

DOG GPS Short

All GPS receivers are also available in a Short version with a shortened collar, these are suitable for smaller dog breeds.

- Short collar is **5 cm shorter** than the classic version
 - The smallest adjustable **collar circuit is 25 cm**

DOG GPS X20

The basic version of the dog tracking device DOG GPS X20 for **a distance of up to 20 km**, which allows you to **track up to 9 dogs** from one receiver.

The dimensions of the device **will ensure your dog's comfort** throughout the entire period of use. The handheld device stands out for its **easy operation** and clarity thanks to its large display.

- Easy to read, backlit LCD display
- Receiver clip for hanging on belt
- Devices are supplied in a handy transport case
- Rechargeable battery: Li-Pol 1900 mAh with more than 40 hours of battery life
- Completely waterproof transmitter and receiver
- The transmitter (collar) is the smallest and lightest of its type

about the possibilities
DOG GPS X20**

Functions of **GPS X20**

CAR MODE

The bodywork and electronics in the car can affect the function of the digital compass in the receiver – the direction to the dog being tracked may not be displayed correctly. When CAR mode is activated, the direction to the dog won't be determined from the digital compass, but from the change in position of the GPS receiver.

RANGE

Track devices and animals up to 20 km.

NUMBER OF DEVICES

Locate and track **up to 9 devices**.

COMPASS

It constantly points north.

BEEPER

Standing detection is a feature for hunting. You can distinguish whether the dog is moving or standing. There are 7 modes to choose from depending on the type of hunt.

CIRCLE FENCE

Circle fence, a feature with an acoustic border that alerts if the dog gets outside. Set the boundary within a radius of 30 m to 2 km.

WAYPOINT

The waypoint allows you to store the GPS coordinates of the place where the receiver is currently located. You can navigate to the saved location later.

RECHARGEABLE

The collar and the handheld device are rechargeable with a long battery life of up to over 40 hours.

WATERPROOF

You don't have to worry about letting your dog into the water.

SOUND

It allows you to activate a tone in the collar that is always perceived by the dog in the same way, regardless of the distance from the handler.

All obvious **at a glance**

On the large backlit LCD display with high contrast, which is easy to read even in direct sunlight.

- 1 Compass - direction to magnetic north
- 2 GPS receiver position accuracy
- 3 Direction to selected transmitter
- 4 Distance to selected transmitter
- 5 GPS transmitter position accuracy
- 6 Receiver battery charge status
- 7 Number of selected paired transmitter
- 8 Transmitter battery charge status
- 9 Details of the next paired transmitter
- 10 Strength of received RF signal

Very durable and rechargeable

Waterproof receiver with fast charging and long battery life of up to 40 hours.

DOG GPS X20

Basic device for locating up to 9 dogs.

- **Transmitter:** 77 × 45 × 29 mm / 142 g
- **Receiver:** 119 × 62 × 15 mm / 197 g
- **Belt:** 25 mm × 70 cm / plastic
- **Battery:** Li-Pol 1900 mAh
- **Smallest adjustable circumference:** 32 cm
- **Product code:** 6120

The waypoint allows you to store the GPS coordinates of the place where the receiver is currently located. You can navigate to the saved location later.

RECHARGEABLE

The collar and the handheld device are rechargeable with a long battery life of up to over 40 hours.

WATERPROOF

You don't have to worry about letting your dog into the water.

SOUND

It allows you to activate a tone in the collar that is always perceived by the dog in the same way, regardless of the distance from the handler.

IMPULSE

Possibility to activate alert in the form of stimulation impulse. If you change the intensity of the stimulation impulse in the app, the intensity of the stimulation impulse is automatically adjusted in the receiver and vice versa.

LIGHT

The light is used to easily locate the dog in the dark. Light signaling is provided by LED diodes placed in the transparent transmitter box.

SOUND LOCATOR

Triggering the loud sound locator placed on the GPS collar. Suitable for locating the dog or the collar itself in dark, dense vegetation.

CONNECTING TO THE APPLICATION

The device can be connected to apps on your phone, tablet and smartwatch.

ONLINE/OFFLINE MAPS

Maps can be used both online and offline. So you don't have to worry about an outage if you happen to be out of internet coverage.

BARK DETECTION

Records the location, time and intensity of the dog's barking in the recorded route. When the dog barks, a symbol is displayed indicating the barking intensity.

TRACKING

Allows you to record the route of all paired and displayed devices on the map. Routes can be saved and played back.

GEOFENCE

Easily mark any space on the map. If the dog leaves the area you have defined, you will be notified by a notification in the app. These are so-called virtual fences (zones), you can mark several of them.

MEASUREMENT

Measure distance and area on the map. Area perimeter in ha and km².

DOG GPS X30

Basic device for locating up to 13 dogs.

SOUND

- **Transmitter:** 77 × 45 × 29 mm / 142 g
- **Receiver:** 119 × 62 × 15 mm / 197 g
- **Battery:** Li-Pol 1900 mAh
- **Belt:** 25 mm × 70 cm / plastic
- **Smallest adjustable circumference:** 32 cm
- **Product code:** 6131

DOG GPS X30B

The device with a sound locator in 3 different tones makes it easy to locate your dog in dense woods or in the dark.

SOUND

SOUND

YouTube

How to **pair** a collar
with a handheld device

Watch our video.

Application **Dogtrace GPS**

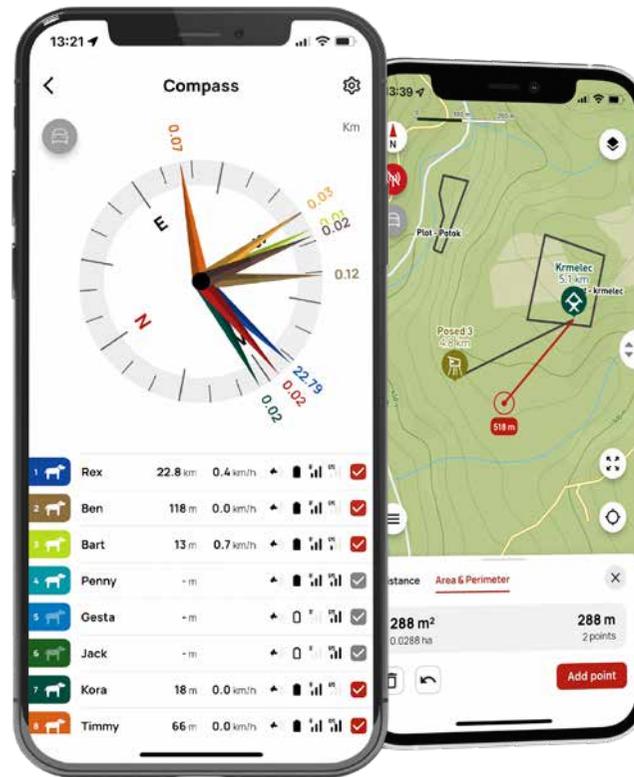

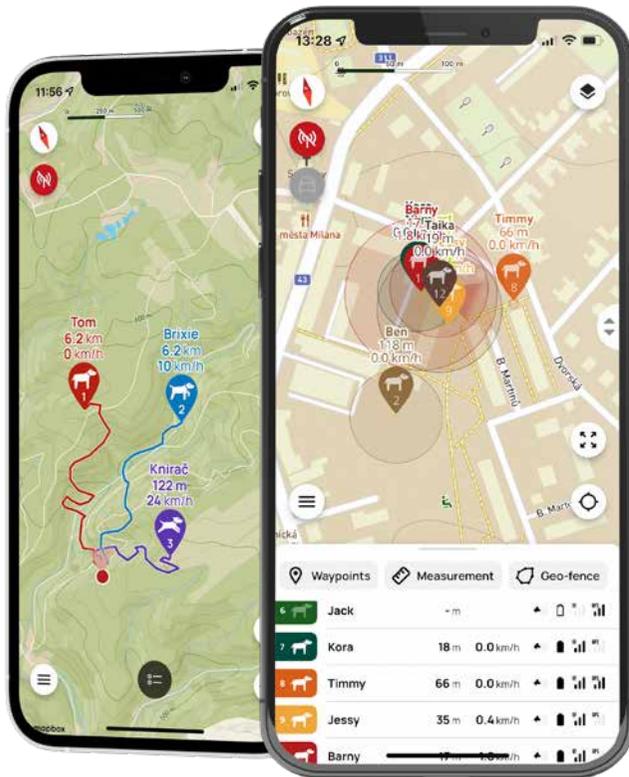

Connect your device to your **mobile phone, tablet or smartwatch** and get the most out of device DOG GPS. App for **Android or iOS**.

All in one place

- Displaying the necessary data in map documents
- Easy pairing with your phone and data synchronisation
- Track, trace and upload up to 13 devices

Always in the right direction

- Compass
- Online/offline maps
- Area and distance measurement

Download app
Dogtrace GPS 2.0

Functions of **Dogtrace GPS app**

ONLINE/OFFLINE MAPS

Maps can be used both online and offline. So you don't have to worry about an outage if you happen to be out of internet coverage.

TRACKING

Allows you to record the route of all paired and displayed devices on the map. Routes can be saved and played back.

COMPASS

It constantly points north.

MEASUREMENT

Measure distance and area on the map. Area perimeter in ha and km².

BARK DETECTION

Records the location, time and intensity of the dog's barking in the recorded route. When the dog barks, a symbol is displayed indicating the barking intensity.

WAYPOINT

The waypoint allows you to store the GPS coordinates of the place where the receiver is currently located. You can navigate to the saved location later.

CIRCLE FENCE

A feature with an acoustic boundary that alerts if the dog gets outside. Set the boundary within a radius of 30 m to 2 km. When the dog leaves the defined area, the receiver starts to sound an audible signal. Can be activated for multiple dogs.

GEOFENCE

Easily mark any space on the map. If the dog leaves the area you have defined, you will be notified by a notification in the app. These are so-called virtual fences (zones), you can mark several of them.

GEOFENCE WITH COMMANDS

Allows individual setting of warning and correction zones when leaving a defined area. Adjustable warning zone with sound signal and correction zone with stimulation impulse.

PAIRING MULTIPLE DEVICES

You can pair other handlers' receivers to your receiver. You will see them all in the map documents.

SOUND

It allows you to activate a tone in the collar that is always perceived by the dog in the same way, regardless of the distance from the handler.

IMPULSE

Possibility to activate alert in the form of stimulation impulse. If you change the intensity of the stimulation impulse in the app, the intensity of the stimulation impulse is automatically adjusted in the receiver and vice versa.

LIGHT

The light is used to easily locate the dog in the dark. Light signaling is provided by LED diodes placed in the transparent transmitter box.

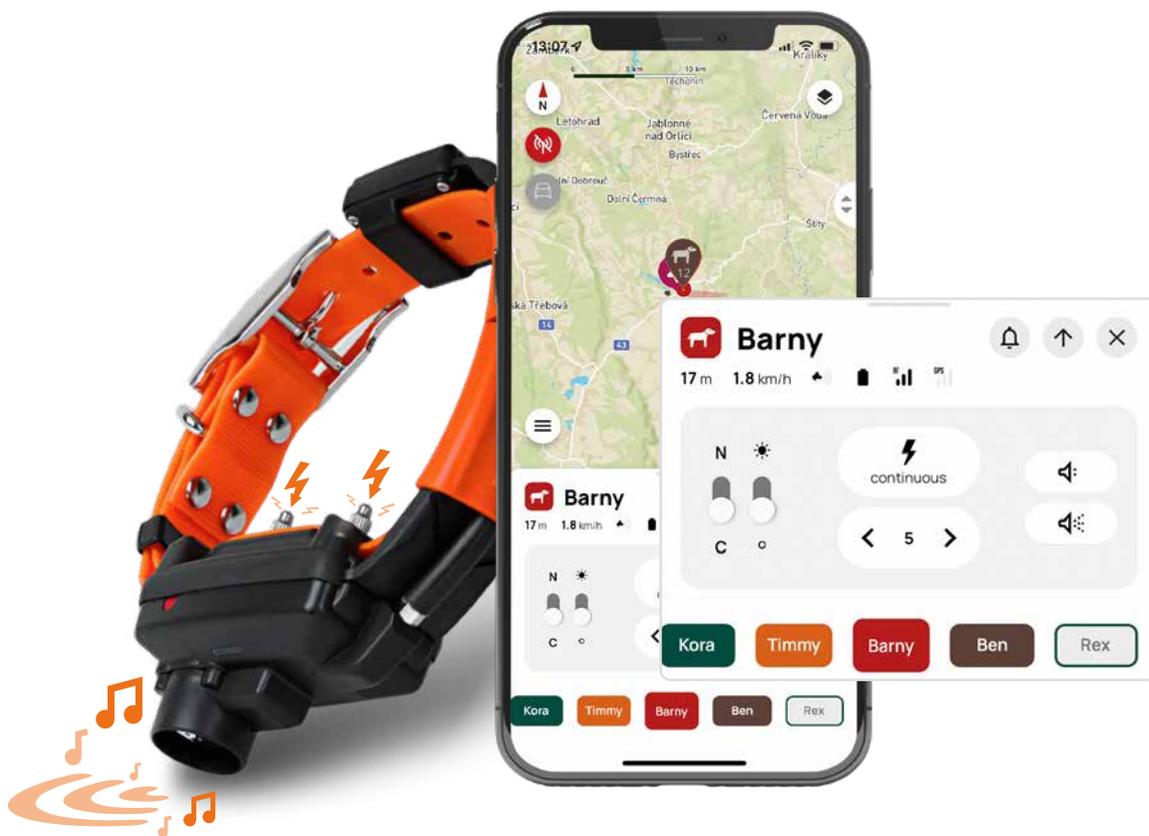

SOUND LOCATOR

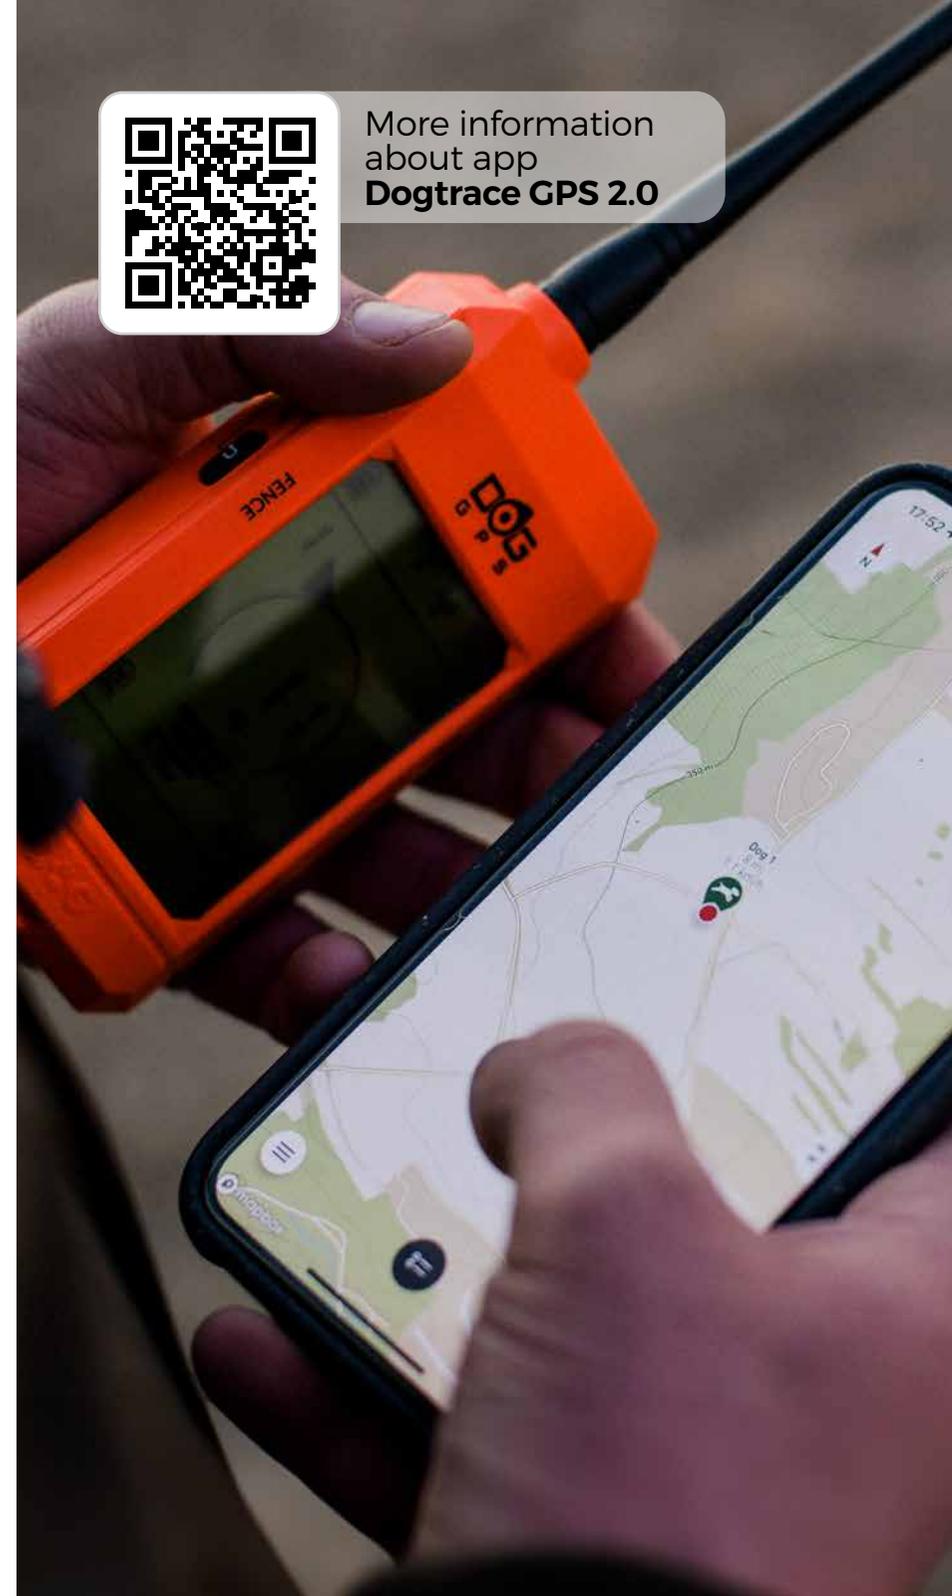

Triggering the loud sound locator placed on the GPS collar. Suitable for locating the dog or the collar itself in dark, dense vegetation.

Control of training module and sound locator

- Controls the built-in training module on X30T and X30TB models. Can be used as an electronic training collar.
- Sound locator designed to locate the dog or the collar itself in dark, dense vegetation.

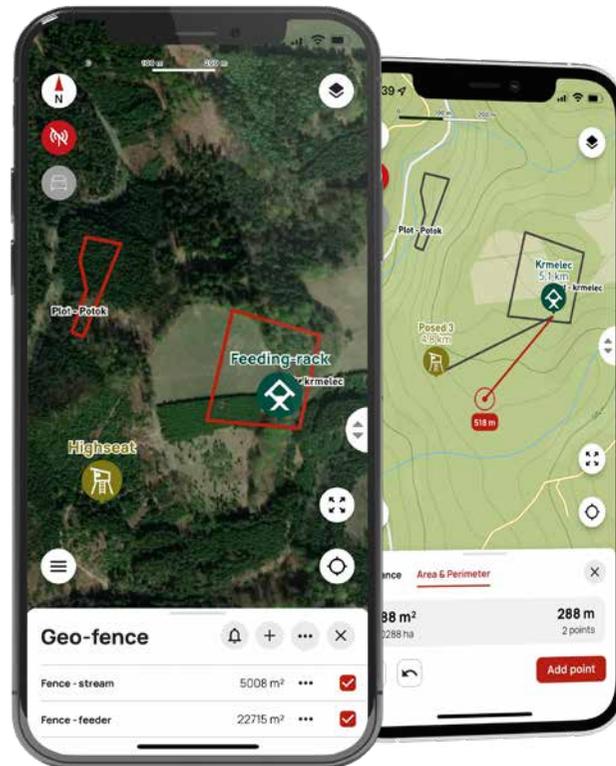

More information
about app
Dogtrace GPS 2.0

Map documents in several online/offline formats

Download maps of the whole world, plan and record routes. Option to download only the desired areas, regions.

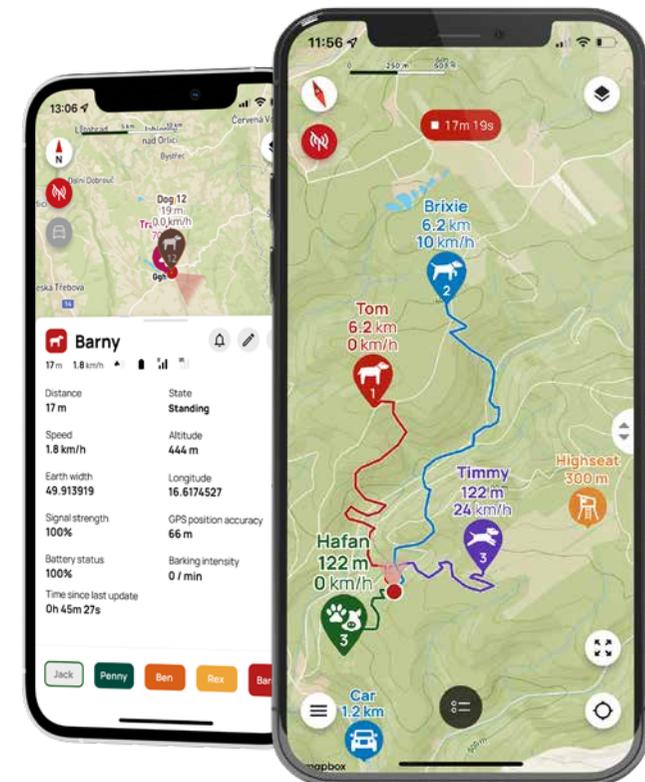

- Basic
- Terrain
- Satellite
- Hybrid

Record routes and save important places

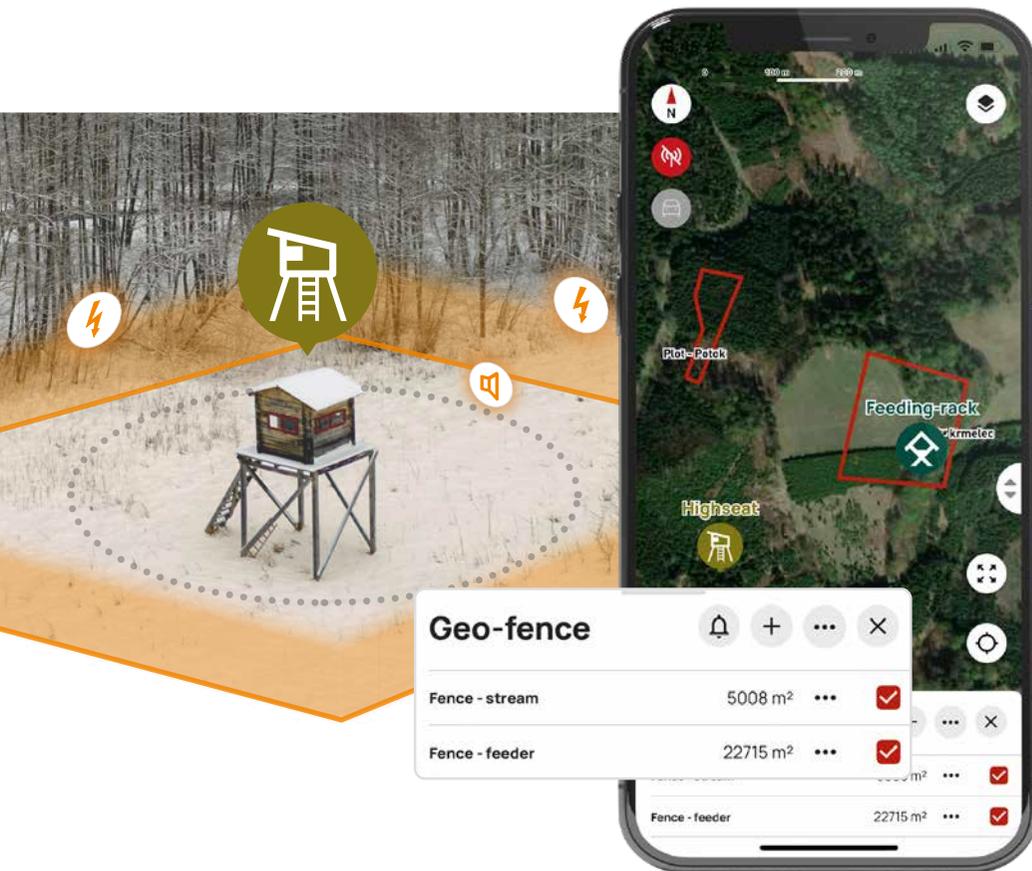

Save the GPS coordinates of your current position, important locations and more.

- Record routes and track back what happened during the hunt
- Find out where the dog was searching and where it wasn't
- Save current positions and important locations

Geo fences with commands

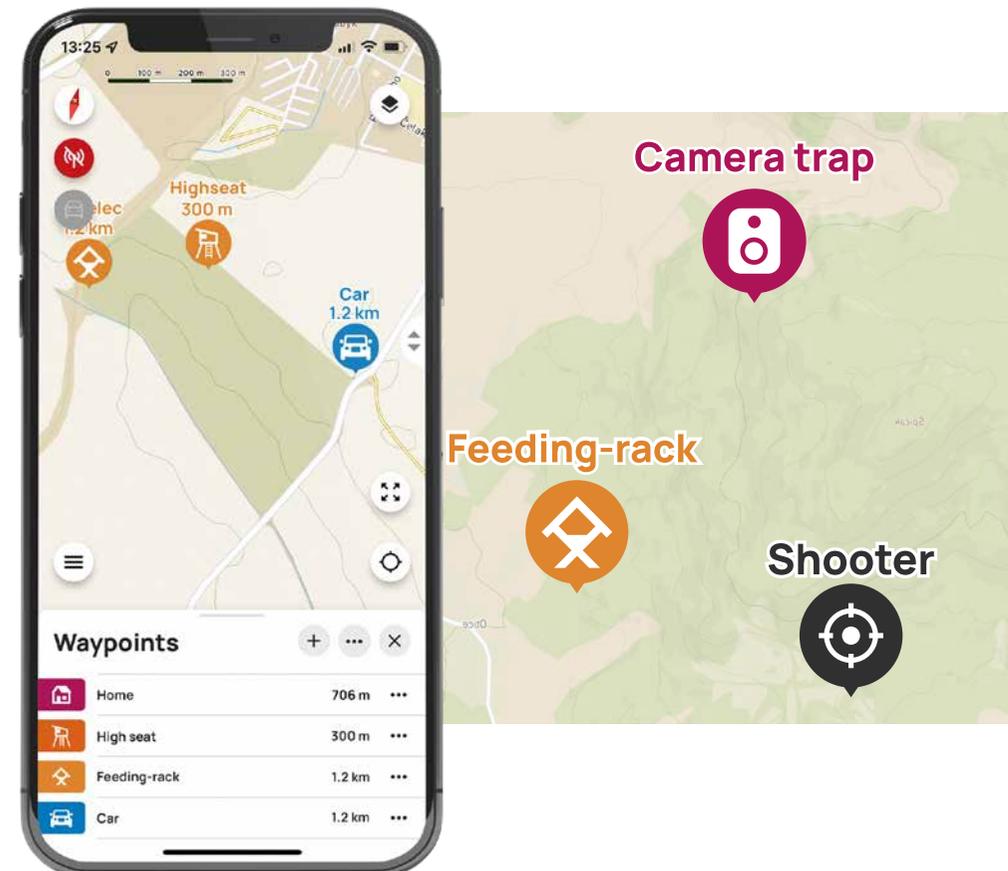

- Create geo fences at will – virtual fences
- Individual setting of the warning and correction zone when leaving the defined area
- Warning zone – sound signal – adjustable from 8 to 200 m
- Correction zone – stimulation impulse

Save waypoints

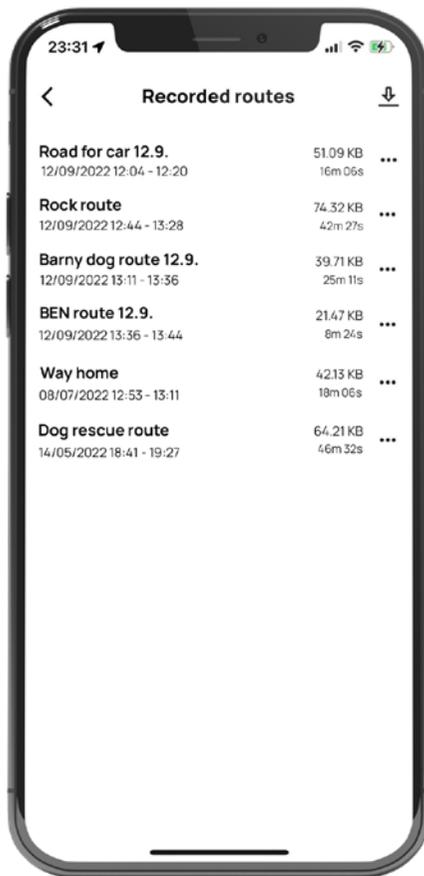

Save the GPS coordinates of your current position, important locations and more.

- You can return to the saved waypoint at any time later
- With waypoints, you won't lose anything
- You always know where to go

Reverse evaluation and download of recorded routes

- Download routes in different formats and upload them to other devices
- Get feedback

Control from a smartwatch

Apps for controlling GPS collars from the X30 series can be paired with iOS, Android (OS Wear) or Garmin watches.

- The app for Android OS is designed for versions **6.0 and higher**
- The app for iOS is for versions **14.0 and higher**
- Compatible watches: Apple Watch, Samsung Galaxy Watch4 / Watch5 and other OS Wear watches
- The app for Garmin available in two versions:
 - Dogtrace GPS 2.0 for most Garmin smartwatches
 - Dogtrace GPS 2.0 Lite for cheaper types smartwatches with low memory

Accessories for **GPS tracking devices**

Receiver protective cover

Protective silicone cover for DOG GPS receiver.

- **Product code:** 6153

Protective tempered glass

Protective tempered glass for DOG GPS receiver.

- **Product code:** 6155

Training module X25/X30T

The training module is used to extend the functions of **DOG GPS X25/X30T** collar.

- **Product code:** 6135

Back plastic clip

Clip for **d-control Professional** transmitters and **GPS** receivers.

- **Product code:** 1077

Transmitter protective cover - orange

Protective cover **against damage** and **dirt**.

- **for DOG GPS X20, X30 and X30T**

Contact points - 10 mm

For GPS **training module**.

- **Product code:** 110

Screws M2 × 12 mm

Transmitter lid screws for **GPS X20, X25 and X30**. Material stainless steel.

- 4 pcs in the package
- **Product code:** 6141

Screws M2 × 16 mm

Screws for **training module** of transmitter **GPS X25/X30T and X25/X30TB**. Material stainless steel.

- 4 pcs in the package
- **Product code:** 6114

GPS TRACKER

for dogs and cats

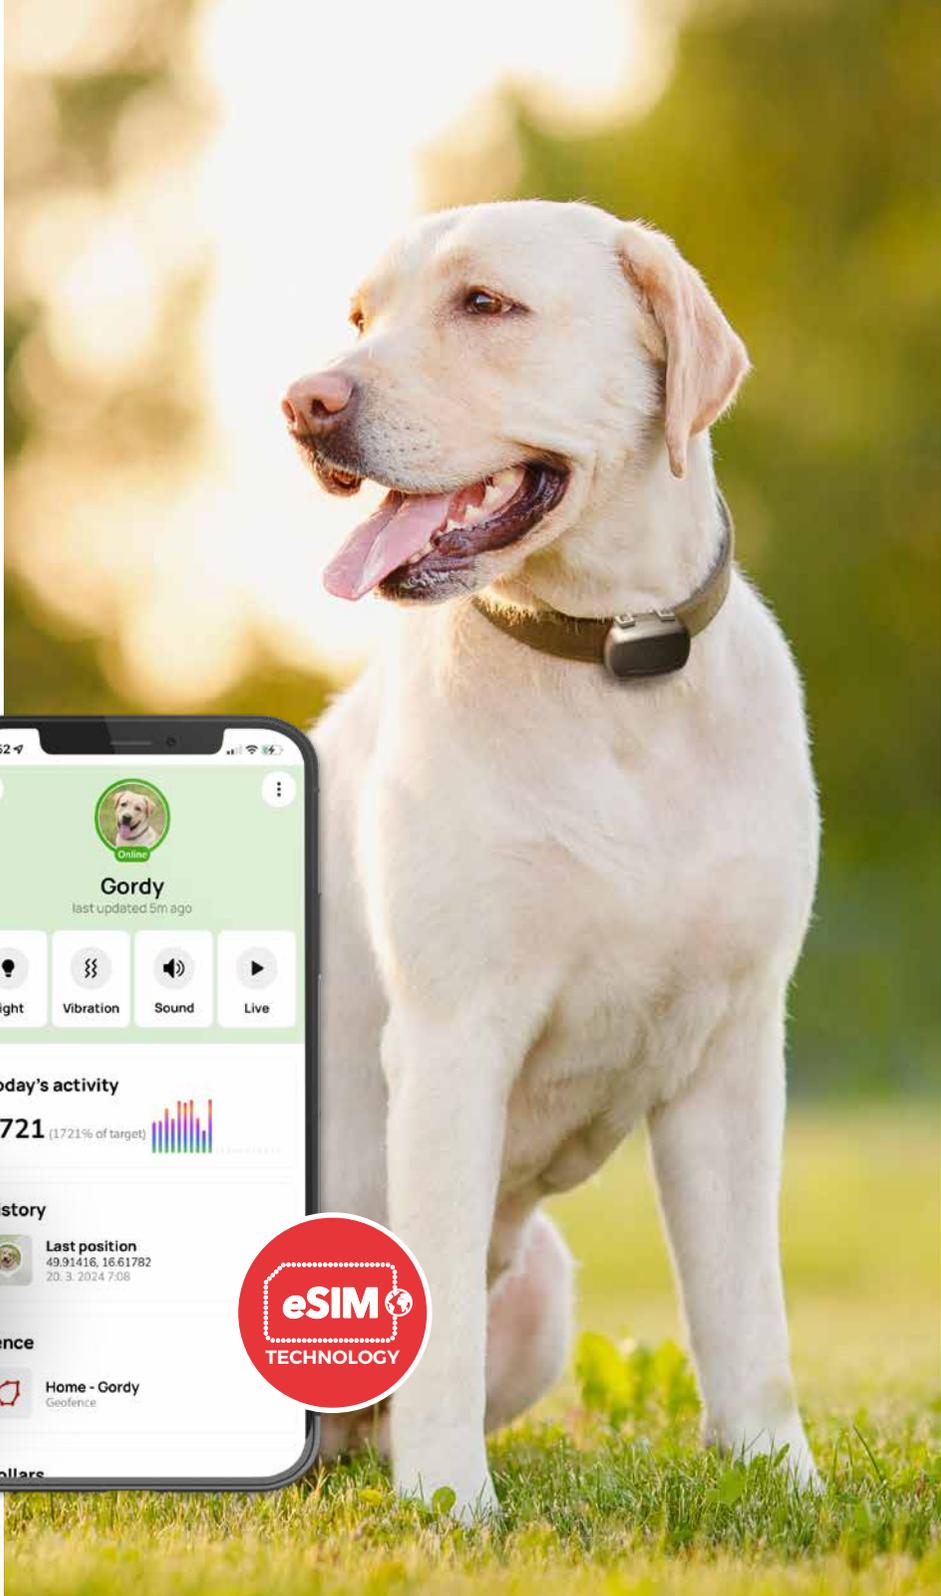

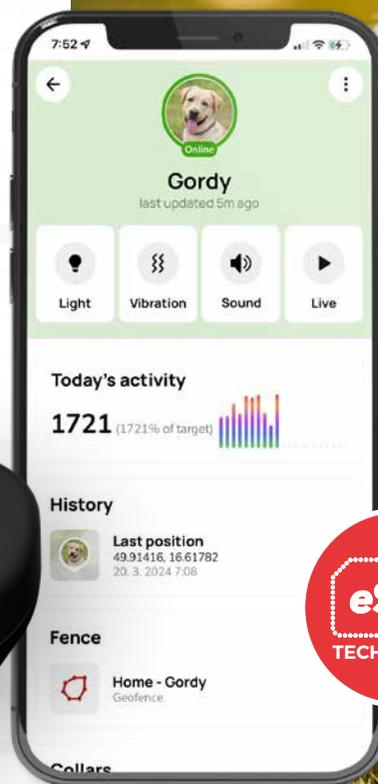

DOG GPS mini

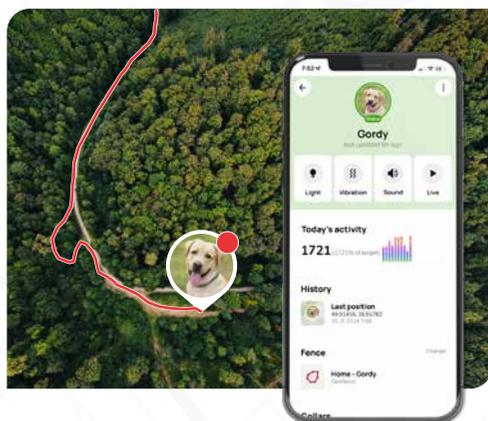

The small gps tracker is a **universal tracking device** that is a suitable solution for every dog owner.

With **the DOG GPS mini** you will always have an overview of your pet's location, movement, activity and health. Above all, you will have information about whether he has left the boundaries of your property.

Keep your pet under control with the app

DOG GPS Pet TRACKER

LIVE MODE

With live tracking, you will find your pet instantly.

- Location updates every 20 seconds

VIRTUAL FENCE

Create safe zones to avoid dangerous places.

- Immediate warning if it leaves the zone
- Keep consumption to a minimum with a Wi-Fi fence

ACTIVITY

Get an overview of the animal's condition and health.

- Compare activity between days and weeks
- See at a glance the number of steps taken, length of run, rest time

Other functions of **GPS mini**

With **DOG GPS mini**, you can take your pet's tracking to a limitless level.

WI-FI FENCE

With a Wi-Fi fence, you can minimize the consumption of your device and still keep track of whether the animal is in the safe zone of the virtual fence.

HISTORY

Thanks to the history, you can track the course of previous routes and activities up to 1 year back and see where your pet's stray paws lead most often.

DATA SHARING

Share your pet with others and supervise its movements and activities together.

SOUND

With the sound function, you can warn the animal of unwanted activity during training.

LIGHT

Thanks to the integrated light on the collar, you can easily locate the animal even in the dark.

VIBRATION

The vibration in the collar can serve as a motivator when training the dog.

RECHARGEABLE BATTERY

The large capacity rechargeable battery will keep the tracker running for up to 1 month. The battery consumption depends on the collar update mode.

WATER RESISTANCE

The device is completely water resistant, so you do not have to worry about immersing the animal in water.

DEVICE COMPATIBILITY

Convenient control from all devices. The app is available for Android and iOS versions and also works in conjunction with smartwatches.

Photo traps

d-guard

Photo traps are modern camouflaged cameras that capture images and videos. They are used in forests to **monitor wildlife** or to **protect property**. They are activated whenever an animal or human movement is detected.

They can also be used to **detect poachers** or thieves or to **keep an eye on various objects**. Photo traps are used by **hunters, cottage and lodge owners** and also biologists and **conservationists**.

A photo trap with a wider field of view captures more of the area, but in poorer quality. At night, photo traps use LEDs to illuminate the light, eliminating light with wavelengths ranging from 850 nm to 940 nm. The more LEDs, the greater the range in lower light conditions.

d-guard mini

Automatic tracking camera on SD card. It monitors the area of interest using a passive infrared (PIR) sensor that **triggers when it detects movement of people, animals.** When detected, the photo trap automatically takes pictures or videos.

- **Dimension:** 105 × 85 × 60 mm
- **Memory card:** SD up to 32 GB
- **Weight:** 185 g
- **Power supply:** 4 pcs AA 1,5V
- **Product code:** 810
